SIGNIFICANCE — HOW IT WILL HELP IN YOUR PROFESSION

1

Your 24/7 AI Agent

Hermes drafts **lesson plans, question papers, notices & student communications** on command via email, Telegram & WhatsApp — an AI employee working even while you sleep.

2

Work faster

Cut **course preparation, assessment design & feedback writing** from hours to minutes — **question banks, slides, rubrics & unit plans** ready before class.

3

Documents in YOUR format

SKILL.md reproduces your own formats — **syllabi, question papers, worksheets, assignments & mark schemes** — classroom-ready and consistent, every single time.

4

Verify before you rely

Check every citation against **prescribed texts, UGC/AICTE norms & primary sources** — before teaching or printing.

5

Zero subscription costs

Content creation, drafting & OCR of **your old notes, handouts & handwritten class records** — all on free, open-source tools, zero subscription costs.

6

Keep data private

Run tools locally so **student records, marks & internal assessments** stay on your computer — never on the servers of AI companies.

WHO SHOULD ATTEND

Faculty & Professors · School Teachers · Guest Faculty · HODs & Deans · Academic Coordinators · Curriculum Designers · Teacher Trainees · Lab Instructors · Education Consultants
